Abstract of FR2828084

The dispenser consists of a housing with a hinged cover, designed to receive a clip-in roll-holding cartridge with two side flanges (4) joined by a connecting plate (6) and a front spacer bar. The upper ends of the flanges have projections (8) to engage with the cleaning material roll, and their lower ends are fitted with a cutting roller (9) and a return roller (10) linked through toothed gears (11, 12), an intermediate gear (19) and fixed and moving (27) cams.
